

- Diminished ability to think or concentrate. Indecisiveness.
  
  - Recurrent thoughts of death, suicidal ideation without a specific plan.
3. Depression is widespread in society and among Christians.
  
  4. Some people are more prone to depression than others.
  
  5. Cases of depression need to be handled with compassion. *Prov 25:20*
  
  6. Different kinds of depression include: major depressive disorder, postpartum depression, seasonal affective disorder, dysythmic disorder, etc.
  
  7. Psychological labels are descriptions which say little about cures or ultimate causes.

B. How are we to understand depression?

1. Many say that depression is merely a disease.
  
  
  
  
  
  
  
  
  
  
2. Many secular psychologists see mankind as merely physical and therefore tend to see depression as a physical problem with a chemical solution.

3. Christians recognize the dual nature of mankind – body and soul. *2 Cor 4:16; 5:8*

- The soul is embedded in a body (which is socially embedded).

- What happens to the body influences the soul. *Job 2*

- What happens to the soul may influence the body. *Prov 14:30; 17:22; Ps 38:1ff*

- What happens in one's social environment may affect both body and soul.

4. Depression affects both body and soul.

5. Depression will always have a spiritual component and will usually have a physical component.

6. Bodily (brain) weakness cannot prevent spiritual growth. *2 Cor 12:7ff; 4:7-10, 16-18*

C. Why do people get depressed?

1. Depression usually has spiritual (soul) causes.

- Sin and guilt. *Ps 32:3-4; 38:1ff; Jer 2:13*

- Overwhelming circumstances. *Ps 42:1-7, 9-10; 43:2; 2 Sam 17:23; Job 1-2*

- Injustice. *Ps 73:2-14*

- Relationships. *Jer 17:5-6*

2. Some depression may have physical causes – exhaustion, substance abuse, brain disease or weakness. *1 Kgs 19:4ff*

3. Sometimes there are multiple causes.

4. You may face cases in which you cannot determine the cause(s). *1 Cor 13*

D. Do drugs help depressed people? *Prov 17:22*

1. Psychotropic drugs are prescribed to bring brain chemistry back into balance.

2. Even if brain chemistry is out of balance it is not clear whether this is the cause of depression or the result of spiritual issues (see above).

3. In cases in which the cause is spiritual, drugs may address the symptoms of depression, but they do not address the cause.

4. Anti-depressants do not claim to cure depression.
  
5. Psychotropic drugs have adverse side-effects and often lose their potency.
  
6. We do not tell people not to use drugs or to get off of their drugs.
  
7. Our focus is addressing the spiritual issues which are always present. *1 Cor 10:13*
  
8. A counselee who chooses to get off of psychotropic drugs must do so under a doctor's supervision.
  
9. While I believe that drugs are over-prescribed for depression, I am reluctant to pass judgment in particular situations. *Matt 7:1ff*

E. Depression works in cycles.

1. Depression cycles down.
  - Depression often begins with a problem followed by a sinful response to that problem which leads to a complicating problem.
  
  - Hopeless thoughts lead to greater hopelessness.

- Failure to perform duties/chores makes one feel more guilty and depressed, which makes it harder to perform duties.

2. Depressed people can cycle back up again.

3. People who are prone to depression tend to cycle in and out of depression.

4. Many have patterns of alternating high activity followed by depression (“bi-polar” or manic-depressive).

5. It often takes a long time for a person to come out of depression. *Ps 88: 13-18*

F. Depression is very serious.

1. Some are debilitated.

2. Those who despair are at risk of suicide. *2 Sam 16:23; 17:14, 23; Jonah 4:3*

3. Depressed people are often angry at God, others and themselves.

G. It is very difficult and draining to counsel depressed people.
